EDUCATION

M.S.
Computer Science
San Diego State University
Aug 2021 - May 2023

B.S.
Computer Science
University of California San Diego
Sep 2018 - Sep 2021
Girls Who Code Alumni

SKILLS

Programming Languages
Java
Python 3.0
C++
C#
HTML/CSS
JavaScript

Tools
JUnit Testing
vim
GitHub

Experience

UI/UX Intern

Clark Center & Qualcomm Institute
Jan 2021 - March 2021

- Collaborated with 5+ colleagues in local and remote locations to create a virtual persistent running environment to visualize all network data from ARNOC's Netbox (GIS data) using Unreal Game Engine (C++).
- Provide UI functionality along with 3rd-party software integrations for a mixed procedural rendered virtual space.
- Practiced strong version control using GitLab and created non-technical descriptions of operations and workflow to enable future non-coding team members to function with minimal interruption.

Software Engineer Intern

Nuevo Foundation
June 2020 - Sep 2020

- Collaborated in a team of 2 engineers to gamify an intro to SQL workshop, including designing artwork and planning game flow.
- Translate technical SQL concepts into plain English and integrate dynamic HTML elements and JavaScript functionality onto a website built with Markdown.
- Worked with Microsoft engineers to provide 12,000 underrepresented students free, hands-on learning workshops to solve real-world problems.

VR Research Intern

UCSD & Qualcomm Institute
Sep 2019 - Mar 2020

- Collaborated in a 3-member team to design a human-centered VR experience targeting stress using Unity (C#) and Oculus Rift.
- Conducted comparative analysis on 10+ existing stress management solutions and incorporate working features into the design.
- Organize presentations and communicate progress on a bi-weekly basis to senior management to adjust project timelines and address issues within 48 hours.

Projects

Pomodoro Web Application

Jan 2021 - Mar 2021

- Collaborated in a multi-disciplinary team of 8 members to build a user-centered Pomodoro Timer Web Application using HTML/CSS, and JavaScript.
- Review and fix code for bugs and conducted 200+ unit tests.
- Designed a CI/CD pipeline to check 100+ GitHub commits for poor code quality, style enforcement violations, and failing unit tests.
- Address performance issues and Improve user accessibility to 96%.
