EDUCATION

SAN DIEGO STATE UNIVERSITY — **San Diego, CA**
Masters of Science in Computer Science — *Aug 2021 - May 2023*
GPA: 3.9
Relevant Courses: Advanced Object Oriented Design, Operating Systems, Parallel Computing, Wireless Networks, Advanced Algorithm Design, Computer Security, 3D Game Programming

UNIVERSITY OF CALIFORNIA – SAN DIEGO — **La Jolla, CA**
Bachelors of Science in Computer Science — *Sep 2018 - Sep 2021*
Provost Honors
Extracurricular: Society of Women Engineers, Girls Who Code, UCSD Women's Center, Art, Technology, Design & Innovation Program
Relevant Courses: Advanced Data Structures, Computer Architecture, Computer Organization, Computer Vision, Software Engineering, Cryptography, Data Science, Design of Digital Systems, Human-Computer Interaction Design, Programming Language Paradigms

EXPERIENCE

SAN DIEGO STATE UNIVERSITY, COMPUTER SCIENCE DEPARTMENT — **San Diego, CA**
Instructional Student Assistant — *May 2022 - Jul 2022*
- Worked in a 6-week, fast-paced environment to teach lessons on data structures using C/C++.
- Provided guidance to 50+ students on setting up local coding environments using Windows Subsystem for Linux (WSL) and connecting to remote environments using Secure Shell (SSH).
- Converted Java unit tests to C++ and wrote scripts to automate grading for 6 programming assignments.

CLARK CENTER & QUALCOMM INSTITUTE — **San Diego, CA**
UI/UX Intern — *Jan 2021 - Mar 2021*
- Collaborated with 5 colleagues in a hybrid environment to create a 3D model displaying network data from ARNOC's Netbox (GIS data) using Unreal Game Engine (C++).
- Designed UI and integrated Oculus Plugin for Unreal Game Engine for a mixed procedural rendered virtual space.
- Practiced strong version control using GitLab and created documentation of operations and workflow to enable future non-coding team members to function with minimal interruption.

NUEVO FOUNDATION — **San Diego, CA**
Software Engineer Intern — *Jun 2020 - Sep 2020*
- Collaborated in a team of 2 engineers to gamify an intro to SQL workshop for children 12 years old and up using CSS, JavaScript, and Markdown.
- Translated technical SQL concepts into plain English and integrated dynamic HTML elements and JavaScript functionality onto a website.
- Collaborated in Scrum development cycles with Microsoft engineers.

PROJECTS

POMODORO WEB APPLICATION — *Jan 2021 - Mar 2021*
- Practiced agile development with a multi-disciplinary team of 8 members to build a user-centered Pomodoro Timer Web Application using HTML, CSS, and JavaScript.
- Designed a CI/CD pipeline to check 100+ GitHub commits for poor code quality, style enforcement violations, and failing unit tests.
- Designed and implemented 200+ unit tests.
- Address performance issues and improve user accessibility to 96% using Google Lighthouse.

MLH HACKXX DIETARY FOOD WEB APPLICATION — *Apr 2018*
- Collaborated with 4 members to design a prototype web application to help expecting mothers (later extended to people with dietary restrictions) find stores near them that sell ingredients from recommended recipes.
- Developed the web application using JavaScript for the web browser version and the Android SDK for the android app version.
- Won award for Best Representation of Women in STEM at the Major League Hacking (MLH) Hackathon HackXX 2018.

SKILLS

- Programming Languages: Java, Python, C++, C#, HTML, CSS, JavaScript, Bash, ARM Assembly
- Software & Tools: VIM, Command Line Linux, Visual Studio Code, Docker, GitHub, Figma, JUnit Testing, Android SDK
